Here's to you and Yours - Dalton Ford

To the students of the Groom Public Schools:

May I call your attention to this one fact? Schools, your school included, were conceived and developed with one idea in mind, that of the further spread of democracy and freedom. The better the service that our schools render, the more nearly free your life will be from the hold of ignorance, prejudice, jealousy, and all of those fetters arising from the fact that one does not know how to get the most out of life. My aim is that our school will develop, progressively, in rendering you more of this service.

Dalton Ford
